

Blockchain Technology Market Analysis by Type (Public Cloud, Private Cloud, Hybrid Cloud), by Component (Application & Solution, Infrastructure & Protocols, Middleware), by Enterprise Size, by Application, by End Use & Region - Global Forecast 2022-2032

Fact.MR (FMR) is a premier provider of syndicated research reports, custom research reports, and consulting services. We deliver a complete packaged solution, which combines current market intelligence, statistical anecdotes, technology inputs, valuable growth insights, aerial view of the competitive framework, and future market trends.

We provide research services at a global as well as regional level; key regions include GCC, ASEAN, and BRIC.

Our offerings cover a broad spectrum of industries including Chemicals, Materials, Energy, Technology, Healthcare, and Retail.

We have a global presence with delivery centers across India specializing in providing global research reports and country research reports. FMR is headquartered out of London, U.K., with a state-of-the-art delivery center located in Pune, India. We combine our knowledge and learning from every corner of the world to distill it to one thing – the perfect solution for our client.

Systematic Research Approach

- ☐ Identifying key opinion leaders
- ☐ Questionnaire design
- ☐ In-depth interviews
- ☐ Coverage across value chain

- ☐ Market participants
- ☐ Key strengths
- ☐ Product portfolio
- ☐ Mapping as per value chain
- ☐ Key focus segments

- ☐ Key industry experts
- ☐ Channel study
- ☐ Developments
- ☐ Market dynamics
- ☐ Products
- ☐ Conclusions

Report Scope & Segmentation

The blockchain technology market has garnered a market value of US\$ 7.36 Bn in 2022, anticipated to register a positive CAGR of 84% in the forecast period 2022-2032 and reach a value of US\$ 3,273.83 Bn.

Prospects further heightened during the COVID-19 pandemic, as businesses began to extensively rely on the internet and other virtual platforms to sustain their operations. Blockchain technology was being extensively utilized to undertake a wide range of processing activities, including financial transactions, gathering of research intelligence and assimilating critical data.

The global blockchain technology market is developing at a rapid rate of growth in the coming few years. The increasing number of innovations and the rising awareness among consumers regarding the benefits of using blockchain technology will accelerate the growth of the market in the near future. Considering these factors, the market is projected to witness high growth over the coming years, registering a CAGR of 84% to top US\$ 3,273.83 Bn by 2032.

By Type:

- Public Cloud
- Private Cloud
- Hybrid Cloud

By Component:

- Application & Solution
- Infrastructure & Protocols
- Middleware

By Application:

- Digital Identity
- Exchanges
- Payments
- Smart Contracts
- Supply Chain Management
- Others

Region

- North America
- Latin America
- Europe
- South East Asia & Pacific
- China
- India
- Middle East & Africa

- On the basis of components, the market has been divided into application & solution, infrastructure & protocols, and middleware.
- The infrastructure & protocols segment dominated the market in 2021 and accounted for more than 60% share of the global revenue.
- The increasing demand for blockchain standards and protocols, such as Ethereum, Openchain, and Hyperledger, is driving the segment growth.
- The users demand protocols as they enable them to share information reliably and securely across cryptocurrency networks.
- Thus, the benefits offered by infrastructure and protocols are contributing to the segment growth.
